### Version #1:

Subject: , Never look at life and making money the same way again!

Hello

Over the years, just a few explosive breakthroughs have made fortunes for those who invented them and those who "switched on" early enough to exploit them for all they were worth.

You probably already know that the truly revolutionary breakthroughs...the ones that changed the way we live...were at first completely ignored by 99.9% of the population. Very few people at the time of those breakthroughs even recognized them; fewer still had enough foresight to exploit them for all they were worth. Those who did, made millions...even... billions! Now, a truly exciting breakthrough for "ordinary" people to make HUGE amounts of money has just surfaced... And the best part is, anybody can take advantage of this new wealth-building breakthrough. You don't need a bunch of capital to get started. You don't need to belong to a special club or be at the forefront of an industry. And you don't need a stratospheric IQ.

In fact, this new wealth-building breakthrough is perfect for anyone who enjoys easy, simple, and dirt-cheap starting—and it doesn't require a lot of work or technical know-how.
