

FINALLY Put an End to the Age-Old Question... "What's for Dinner Tonight?!?"

"Uncover the Secret to **HEALTHY & NUTRITIOUS Meals, While Saving Both Time & Money!"**

NEWLY UPDATED FOR 2007:
Including over 150,000 Absolutely Mouthwatering Recipes!

Dear Friend,

A few months ago, my niece Catherine visited me for the holidays. My niece has an incredible passion for helpful software programs that save time and money. During her visit, I asked her if she knew of any computer programs that could help families save time while having more fun in the kitchen. Catherine wasn't sure if one existed, so I challenged her to find one. After the holidays passed, I completely forgot about our conversation.

Within a few months, I received a surprise call from my niece, Catherine, who said she'd found incredible new software and was excited to show me how it all worked. After hearing a little about the application, I became so interested that I immediately booked airline tickets to Florida, where she lived. When I reached her home, Catherine eagerly showed me how the software worked.

Needless to say, I was ***absolutely amazed*** by what I saw.

After two days with my niece, I flew back to my residence. The software looked so great that I cut short my stay to test everything firsthand. I'm happy to report that since October 2005, I've been using the software my niece discovered every single day and have been thoroughly impressed with the results!

For the past few years (since using this amazing software), I've never had to rack my brain for what to cook each day or make extra trips to the supermarket (except for the weekly scheduled visits). And my meals are no longer bland and boring. Instead, I'm now able to choose from literally thousands of recipes that are quick, easy, and not to mention absolutely delicious!

PLUS, for the first time I can remember, I'm easily monitoring and controlling the recommended daily allowances of Cholesterol, Sodium, Fat, and Calories in my family's diet. It seems my niece found an incredible solution to the problem thousands of busy and working people face daily. And thankfully, the software was so incredibly easy and simple to use - I didn't even need any computer knowledge at all to use it.

Let's face it: most working people have the most common problem is finding a recipe that everyone in your family will love. Even if you have a good recipe, it's often a big headache to check if all the groceries are available for preparing it. Not to mention those weekly trips to the market and stocking up on everything you need - and who really has the free time to write it all down and search for coupons?

The **SendMeRecipes (SMR)** software changes everything you've ever known about meal planning!

The PRACTICAL Solution to Daily Meal Preparation has FINALLY Arrived.

If You Can Click a Mouse, You Can Use This Software!
